

### **Travel grant supported by CSL Behring**

A new travel grant is available for those applicants who are over 35 years and have no funding to cover conference registration, travel and accommodation costs.

Physicians eligible for necessary and appropriate travel grants should:

1. See HAE patients and manage their therapy or do basic or clinical research to improve the diagnosis or treatment of HAE and
2. not be able to fund participation at the workshop from their own hospital/institution.

Applicants should provide a written confirmation by their institution to confirm that they meet both requirements. The budget of the travel grant is limited to 10,000 Euro. Selection of grant recipients is done by the organizing committee. Applications submitted earlier have a greater chance of being accepted.
